# DO YOU WANT TO BEGIN YOUR JOURNEY OF UNDERSTANDING HOW TO INTERACT WITH A SYNTROPIC SYSTEM OVER TIME?

---

This advanced, hands-on workshop is **designed for those with a foundational understanding of syntropic agriculture**, offering in-depth knowledge and practice for guiding plantations across seasons and stages of maturity.

Unlock the skills needed to successfully manage and evolve your syntropic agroforestry systems through all stages of growth!

# WHAT YOU'LL LEARN

---

## **Selective Weeding & Pruning**

Learn how to guide natural succession by managing spontaneous plants, optimizing plant density, and pruning effectively.

## **Organic Matter Management**

Use organic matter strategically to promote succession, support desired plants, and create soil health.

## **Seasonal & Successional Strategies**

Discover intervention techniques tailored to the age of your plantation and the time of year.

## **Practical Planning & Execution**

Develop confidence in reading your system, identifying priorities, and implementing a work plan.

# LEARN WITH FELIPE AMATO

Felipe has been teaching for 10+ years in Europe and Brazil – open and charismatic, using lots of practical & audiovisual examples!
