WORKSHOP

FOUNDATIONS & PRINCIPLES OF SYNTROPIC FARMING

📍 Hof vErde, Germany

TERRA
NETWORK

GEMEINSCHAFTS

HOF vERDE

DO YOU WANT TO TAKE YOUR FIRST STEPS IN THE PARADIGM-SHIFTING WORLD OF SYNTROPIC FARMING?

We will embark on a collaborative journey aimed at providing you with a **comprehensive understanding of the foundations and principles of syntropic farming** as applied to fruit, nut and berry systems.

We will be implementing a small new area and also showing development and succession in an existing syntropic system. Hof vErde has been adapting **syntropic farming practices for temperate climates** since 2021.

WHAT YOU'LL LEARN

Foundations of Syntropic Farming

Explore the basic principles and ideas behind syntropic farming, including its history, natural succession, and plant stratification, as a starting point for your learning path.

Designing Systems in Harmony with Nature

Begin to understand how to plan and manage diverse plant systems according to the plants' need of light and their stage in succession, tailored to temperate climates.

Soil Health and Resilience Techniques

Get an introduction to practices like disturbance and succession planting that create healthy soils.

Practical Steps to Get Started

Participate in practical design and field exercises and gain hands-on experience with planting systems.

LEARN WITH FELIPE AMATO

Felipe has been teaching for 10+ years in Europe and Brazil – open and charismatic, using lots of practical & audiovisual examples!

REGISTRATIONS NOW OPEN COME JOIN US!

When

13.02. – 17.02.2026

Where

Hof vErde, Kleinsendelbach,
Germany

Costs

600€ including lunch &
snacks

Workshop Language

English
